Mandated reduction of positions over the limit maximum sizes. IE, if position limit is over 7% of the available contracts the available commodity per time period regulated then a player with 18% would have 3 years to unwind the position and attain the 7% level or less. Mandated progress of 10% reduction per 3 month time period for each quarter with the entire position to be unwound by the 3 year time limit.

Unwind all positions to the level regulation size within 3 years, at least unwinding 10% per fiscal quarter. No increase in position size would be allowable. Failure to make the required levels would result in Tax Increases and or penalties.

Smooth, efficient and friendly. No anger, no pain nor hardship and minimal disruption of ordinary peoples lives. I have near paranoid fear right now. I am considering my positions as vulnerable. When a giant falls, little folks like me are likely to get crushed. I hope and pray this situation, which needs regulating better, can be solved well. Thanks for all your efforts and work in a difficult time period. Ed, the Gold Mine Investor.

PS, people being people, they will wish to simply reorganize their operations to avoid or plan around the regulations. The Senators are asking a lot of you all in a short amount of time it seems. Perhaps give them some progress to avoid what I fear. I fear someone with not enough knowledge of the situations and a desire to please the Senators taking over your seats somehow and delivering the Great Depression 2 to the USA and much of the world. Good luck!
